Dear Pamela Monroe,

Why is Northern Pass being constructed under a Project Labor Agreement and not through open competition for bids? This added cost will be passed on to NH and all NE ratepayers. Eversource has constructed new substations, lines and terminals under the PLA due to pressure from organized labor costing ratepayers additional money. Why is Eversource being pressured to use organized labor? The threat from organized labor that they wouldn't support Northern Pass unless Eversource agreed to the PLA seems to be the likely cause.

Sincerely,
Richard MacNeill
