Dear Pamela Monroe,

It will ruin our views the towers are too big. It will not benefit us at all only south of us will get the power while we have to look at the towers. It should be up to the people not the paid off politicians who decide the fate of our beautiful state. Which northern pass will ruin!!!! What will we give to our grandchildren to look at? Let Massachusetts and the states to the south get their own power without coming through our state.

Sincerely,
Cheryl Moulton
