December 15, 2017

Dear Pamela Monroe,

There is too much risk for the minimal benefits received. No substantial jobs for New Hampshire. But most importantly any leak causes permanent damage devastating the entire area and water system feeding us. This is not a risk that I want to take now, for our children or future generations. To me it is simple. PROTECT THE GRANITE STATE. I love this state. Stop the Northern Pass.

Sincerely,
Danielle Vezina
