Dear Pamela Monroe,

As a citizen in the Great North Woods, through which Northern Pass will negatively impact our tourism with no assurances of adequate remuneration for the impact the project will have, I do not support the completion of Northern Pass. We also have no assurances after completion that electric rates will be lowered in the Northern part of the state after our land is used to transport the power to southern New England. Please do not support corporate greed over the well being of New Hampshire citizens.

Humbly yours,
Logan Peterson
