Dear Pamela Monroe,

For five years I have been adamantly against the pursuit of Northern Pass to deliver more hydro energy to Southern New England. I live in Whitefield, N.H. which has the greatest number of towers crossing our community; our acres support a river, three lakes and faces the White Mountains. I know the threat of taller towers will destroy the quality of life that values rural beauty. It has already impacted the town's Real Estate values; many property owners have been unable to sell because of uncertainty of future to Stop or Bury Northern Pass.

As a Legislator for District 5, I spoke three times at the public meetings held at The Mountain View Grand stating my opposition and my reasons. I am appalled that a decision has required years without encouraging conservation of use, the only real solution in face of climate change.

Hopefully your wisdom and sincere concern about protecting our environment and support of Coos County's tourism's growth will guide your decision in the upcoming weeks.

Sincerely,  
Marcia L. Hammon, Dec. 15, 2017
