Dear Pamela Monroe,

Thank you for respecting my opposition to this project.

My personal reasons for opposing the Northern Pass Transmission Line Project include the following:  
It will be another source of poison to our clean north country air  
It will ruin our beautiful views of our New Hampshire landscape  
There will not be a sufficient monetary benefit to New Hampshire citizens  
Although the project will provide employment during the construction phase, there will not be long-term employment benefits for NH residents.

My goal of this message is to protect the integrity of our beautiful state. Progress often is not in our best interest.

I am also in the tourism industry, which will definitely not benefit from a project of this type.

Sincerely,  
Michelle Hinds
