Dear Pamela Monroe,

I am writing in hopes that my voice will be heard and our State will remain without power lines running through our land. There is absolutely no need for this project to take place as it will completely destroy NH's beauty in the White Mountains and Lakes. I personally spend a lot of time up north and enjoy the peaceful serenity that the land brings. I think it would be the worst decision to allow this terrible project to take place. It's not necessary and if there is a shortage of power in the South- USE SOLAR!!! Don't drive out the animals and nature by destroying it with these ugly power lines.

Sincerely,
Paul Luscher
