Dear Pamela Monroe,

The Northern Pass project is an unneeded, unwanted, and unnecessary for New Hampshire. The unsightly towers and/or swath of open space for the buried line will put a blight on our beautiful scenery here in northern New Hampshire. The touted increase in jobs is only temporary, the electricity produced from this project will not benefit the people that the desecration of the land will affect. All around there is no observed plus side to the people of the North Country. The thought of the loss of the spectacular views is heartbreaking. Please do not allow this project to go forward, no matter the amount of money that Eversource offers for your vote.

Sincerely, Kevin and Jane McKinnon
Colebrook NH 03576

Sincerely,
Kevin and Jane McKinnon
