Dear Pamela Monroe,

Please find American alternatives to the monstrous Northern Pass from Canada. The technology is outdated and at risk from expensive damage from storms - as experienced in the recent October storms. The loss of beauty and natural resources will be irreplaceable. The massive alteration to the land from headwaters to power facility will be devastating and not truly "clean," and sustainable. Please find progressive solutions.

Concerned for our sustainable future. Doing my part by co-generating electricity and living net zero in New Hampshire!

Sincerely,
Karen Payne
