Dear Pamela Monroe,

Given the present political negligence this administration has perpetrated with respect to environmental protection laws, we consider it further devastation to the health of our beautiful state, and equally that of our world, to proceed with Northern Pass. Our small neighborhood has witnessed the recent destruction of (a mere) 14 acres of beautiful woodland and the many nuances of its devastating effects. To force this Pass through our state would be a moral travesty. What person would take responsibility for the long-term results?!

Sincerely,
Terry Moher
