### CommenterWords

I oppose this project for multiple reasons. First and foremost is the fact that the company supplying the electricity for this project, HydroQuebec, has utterly devastated the lands of native peoples in Canada with their dams. Second I'm opposed to a project that will disfigure the countryside of our beautiful state and significantly lessen tourism to the already struggling regions of our state. Third I believe that the electricity provided in this project will do little to benefit the people of NH as the main goal is to supply electricity to Southern New England. Please do the right thing for our state and countless future generations of granite staters and listen to the people of our state who are overwhelmingly opposed to this project.
