Dear NH Site Evaluation Cmte.,

I am not a NH "native" and have only lived in The Granite State for 10 years. But I have come to love and treasure the pristine beauty of our state, and wouldn't trade it for ANY other place in America .

Gov. Sununu is grossly misinformed and has bought into the "fake news" that this project will be a boon to all state residents and result in lower electric bills. FALSE!! UNTRUTH! TOTAL BOLOGNA!! All those MHz will be shipped to southern NH and then transmitted to a larger grid that will benefit others - mostly in MA - NOT us!

He also misleads the public by touting the "economic boom" that will accompany this project because of the jobs it will bring. More "fake news"! Those job seekers will come from out-of-state, and probably many from Canada. They'll be gone as soon as they get their last paychecks. Whatever gains to the local and state coffers will be short-term at best.

These Canadian money grubbers don't give a hoot about what this will do to our landscape and the fragile eco-system in the North Country. Why should they - they won't have to look at the damage as it's done and long afterwards. All they care about is the almighty \$\$.

PLEASE do not allow this "foreign invasion" by a Canadian mega-utility to ruin what we cherish here in the Lakes Region!

Thank you for your thoughtful consideration. And when you deliberate, put yourselves in the shoes of lifelong residents who have lived along the project's route. The quality of their lives will be altered forever.

Sincerely,  
Creig Doyle
