Please we get no benefits from this power run, it will put small buisnesss out of work and interupt the shear beauty of NH ...Quebec Power has no regard for us and our land...they are just a greedy buisness... I ask does the southern of New Enlgland really need this power?  
If it does have to happen bury the eye sore in the minium of 93 this has all be excavated at least once and will only obstuck a minium amount of traffic...
