### CommenterWords

The huge towers that would be part of Northern Pass would cause a major problem with the views that are such an important part of NH. Northern Pass would have a negative impact on the tourism industry which is an integral part of the NH economy. The disruption from the building of the lines would destroy large natural areas. Please bury the whole Northern Pass project. I've heard some ideas about using land beside route 93. Or if it's not possible to bury it, then don't build it at all.
