Dear Pamela Monroe,

We urge you to use existing towers(National Grids I believe. They can and want to), bury all, or reject the Northern Pass. If this is approved it will permanently damage the natural heritage, environment, scenic landscape, and the complete sense of well being NH brings to everything. 1,800 or so massive towers(with power lines) zig zagging thru NH, north to south. We know this personally one of the many properties this is going thru is Sunny Acres Farm, 75 Old Stage Road, Bristol, NH. It's a late 1700's farm off the designated scenic Peaked Hill Road. The Northern Pass will go thru the front yard(100 or so feet from our front door and windows) across Peaked Hill Road and along side it across rte104 and across the Pemi River(again for the 3rd time in about 15 or less miles).

Most off Sunny Acres was put into easement as to protect/preserve(from stuff like this) for ever and for everyone. What's the use if this goes thru? The sight, the noise, physical health risk, and mental health risk. So much for the sense of well being this place brings to everyone that comes here. Right out the front door and windows 24 hours a day 365 days a year over and over,again and again. It's already messing with our brains just thinking about it. Put it in your or families front yard and see what you think about?!!!

This farm is just one of very many properties that will be adversely and permanently affected Gee!!!
Thanks so much!!!!!!!!!!!!!!

There are multiple sound ways of doing this. I believe it's National Grids towers and lines going thru Alexandria. They can and want to put the power lines on there. Bury all the power lines.

We are asking you folks think about this thing in your front yard??? What kind of New Hampshire do want to leave. Or maybe you prefer Northern New Jersey?

Thanks for reading. Respectfully, Nick Jenkins, Mary Worthen, Lynn Passenissi and all of the Worthens of Peaked Hill

Sincerely,
Nick Jenkins
