Dear Pamela Monroe,

There are so many reasons to say no, the fact that that hydroquebec will bury lines in Canada, but eversource won't bury lines here, the entire cost of constructing 192 miles of new transmission lines in New Hampshire and 49 miles in Quebec will be recouped as part of the price we will pay for the hydro power transmitted from Quebec into the New England market and then there is the environmental damage and eyesore. In addition more people oppose this than support it, especially where the lines are suppose to go.

Sincerely,  
Carol Meise
