Dear Pamela Monroe,

I believe that the present plan for the Northern Pass should not be accepted. I understand the arguments that have been given for hydroelectric power from Canada but do feel that there are possible alternatives that need to be explored considering the nonmonetary costs to New Hampshire. It would be extremely short sighted to embrace the plan that would have such negative impact on the state when in the near future with effort less detrimental options can become available.

Sincerely,
V.Nichols R. Butterfield
