Just no.

We have been fighting against this for years, now.

The applicants have only proven that the motivation for pursuing this ill conceived "project" is for the monetary reward.

After attending countless meetings and hearings, it became clear to me that those, who are seeking to promote Northern Pass, are doing so, with reckless abandon...with testimony and actions that serve as documented proof. It is beyond reason, that NP is still being considered as a valid, or worthy possibility for New Hampshire.

Please .

Be thoughtful to the true value of our state.

Be mindful of the many people who are worthy of your respect.
