This proposal dessimates New Hampshire's primary industry, tourism and real estate. Installing harmful high tension electrical towers through the natural landscape of one of the few untouched lands in our country. This is a reckless and destructive plan, high winds, heavy ice and snow present formidable issues for these towers, not to mention the proven health risks for those misfortunate enough to reside nearby, who's property value will plummet through no cause of their own nor any profit from this intrusion in their lives. Who will compensate their loss? The State of New Hampshire for allowing this to happen? For allowing a for-profit company to cause permant destruction to others for their own corporate gain? Where is the justice, common sense, protection of the people from a government allowing such an unnecessary affront on our state with no gain for our communities? Who will take responsibility for these issues? Our Governor and state representatives for allowing this? No, it will be the taxpayers and residents bailing out the fallout from the short-sighted opinions of the decision makers who were voted to protect New Hampshire's right to Life, Liberty and the pursuit of happiness. Please do the right thing and vote No on The Northern Pass, there is no benefit that outweighs the long term loss.

Thank you for your consideration of the people of New Hampshire.

Sincerely,

Laurie Murray
