Dear Pamela Monroe,

For 150 years the White Mountain National Forest has been NH's best-known, most tourist-attracting resource. And now the NP could spoil that? What New Hampshire person in his/her right mind with any sense of history, loyalty and stewardship of the state's resources could support such a foolish idea? And the facts don't even support it: NH will get only 10% of the energy produced by NP - energy which we don't need - and there will be only temporary jobs created. In fact the injury to our tourist industry could negatively impact the economy in the region that most needs help: Coos County. Please do not approve this project!

Sincerely,  
Dr. Barbara Wauchope
