Dear Pamela Monroe,

Dear Counselor Monroe,

everything I've read about the Northern Pass project has me believing that our rates are going to go up, the cost of the project will be much more than projected, the environment will be adversely impacted and we will not see any benefits (job creation) to this project at all! I am completely against this project and I hope that you will represent the hard-working people that live and love this state so much and vote against it.

Sincerely,
Kathleen Costello
