Dear Members of the SEC,

Each one of you should weigh the extremely evident opposition to Northern Pass very heavily before making a decision on permitting the project. The destruction and disruption can never be erased once done. I am against the Northern Pass project in its entirety. It is time you to step up to the plate and let Eversource know that they need to look at other options that do not include destroying our environment, our ecosystems, our scenic views, our tourism, our down town areas and our way of life. Please deny their request on Northern Pass.

Thank you,
Arlene Stoppe
