### CommenterWords

Dear SEC Members,

As a sixty year resident of NH I am heart broken to think of the extremely negative, unprecedented impacts the Northern Pass Project will have on our state from a visual and cultural and, therefore, tourism/economic perspective. If this project is built as proposed there will be no going back and this state -- with its unique, rich and beautiful landscape -- will never be the same. As decision makers, you hold an extremely heavy burden to protect us from this fate. Please require it to be built underground if the project is to go forward.

Respectfully,  
Cindy Hayden
