---

Dear SEC Members:

I am opposed to Northern Pass. I believe it will destroy our land and ecosystems, our beautiful scenery, our tourism economy and disrupt the lives of NH citizens to come. I have also read that in the end it will create at most 10 jobs for the people of NH and job addition is purely temporary. We do not benefit from this electricity and it appears- after having been in Europe this past month as well as Portland Oregon- that the construction of above ground electricity is already obsolete.

This is not in the best interest of New Hampshire. This will seriously disrupt all our lives and lose money for towns like Plymouth when they destroy our downtown to put in their lines. They do not have to destroy our towns to bring electricity to states south of us. . This will only hurt NH. Please abide by the people's wishes and oppose this project.

Sincerely,

Mary Catherine Gennaro, DO
