### CommenterWords

I hate to see this happen to NH. This has the ring of big business shoving something that is not needed in NH down peoples throats. The jobs are temporary,the electricity will only be used for Southern NH and Mass. Our electric prices are sky high and this will not lower them for us. Its an eye sore cutting through vast amounts of land that is why people live in NH for. The views will be ruined and so wont the values of property... Bury the entire line and I will have nothing but praise for it.

Eversource has told too many untruths to be trust worthy. Canada can bury their line but come down in the US and only bury some? Please please reconsider what this means for lifelong residents who take pride in this state... Do not let Northern Pass ruin what we have here.
