This will be so harmful, economically, to the people in NE who depend on tourism and a real destruction for our wild life- we keep pushing these animals out of their natural homes.

Please vote to save our beautiful region. So many have come here from the southern tier of the the state & mass, NJ, Ct, NY (where they ruined their own natural lands in the name of progress (i.e. to put money in their pockets) and now they head north. The only hope up here is to have good old fashioned winters (to drive them south again) but that is unlikely with the global warming.
