### CommenterWords

This Northern Pass is another road to hell. As they say "the road to HELL is paved with good intentions." This would amount to a huge SCAR down the center of NH. It will scarify the beauty of NH, ruin the serenity, and sabotage the way of life that New England used to be affiliated with. Like an unnecessary open-heart surgery, this scar down the very center of the state, will NOT improve lives in this state. NH will die on the operating table, NEVER to be the same, or be revived again. Only legislators and fools could possibly believe that life in the Granite State will be improved by this. Greed and envy from northern neighbors, combined with the greed and mismanagement of southern neighbors that have already ruined their own state, land, and resources, have pooled their "resources" in their efforts to undermine the quality of life that exists in NH, a superlative environment that these places can NEVER have again. They've already ruined their own landscapes forevermore, and now they want to ruin NH. Is this "misery loves company?" Is this short-sighted? Some more money for Canada and some more "cheap" electricity for Massachusetts? Why don't they enjoy their own road to hell which they've already paved, and leave NH alone? Why don't our politicians and NH legislators protect our state?! Why SO greedy? For shame, for shame. This prospect is SO appalling. Really, truly horrible. Say NO to NOthern Pass! Pack your bags of bullshit and ruination back to Canada and Massachusetts, and leave New Hampshire alone!
