Please consider all the damage to our beautiful state that Northern Pass will cause. We can never take back the trees and all the destruction they will cause can not be easily reversed. We must consider future generations and I feel we have a responsibility to them to keep NH and our way of life here intact. Please do not let this huge company tell the people that we need to run this line through our state for our own good,. This is just not true. For one, the power lines will be a huge eye sore for those living here and all our tourists now pouring money into our economy. Also, there is a huge problem with people's property values going down all around this project. It is just not right for NH. As a final note, I do feel that If this project is going to be pushed on our state, that at the very least ALL the lines must be buried.

Thank you,
Tina Graves
