Dear Pamela Monroe,

I am against the northern pass. As a Real estate agent I know it will affect property values and the tourism industry. I dont see the benefits. Jobs will be filled by out of staters and the electricity is passing through. Our state is known for its beauty especially the serene northern parts. How about putting wind farms on the cape in MA. I'm sure the residents would love to help out their own community.

Sincerely,
Deb Peverly
