Dear Pamela Monroe,

Dear Recipients,

I strongly object to the Northern Pass Project. It will have a negative impact to the environment. The only jobs created for this project will be short-term. Only a small percentage of the energy transmitted by these power lines will benefit New Hampshire. Since Hydro-Quebec is not paying for this project, I certainly don't want to. I am still paying for the costly project that the previous supplier who is now affiliated with Eversource Energy, spent for the Seabrook Nuclear Power Plant. I do not want higher level management and politicians pushing this project through when the majority of New Hampshire residents disagree with this project.

Sincerely,
Greg Brigham
