---

Hi Pamela,

Just want to confirm my opposition to Northern Pass as a resident of central NH since 1973. I am for wind power and for hydro-electric power but not at the sacrifice of the environment.

Money is the only reason for not burying all of the power lines and if Northern Pass spent as much money on burying the lines as they have on delays and legal fees they would probably be on time and under budget.

Thank you for listening (reading) our thoughts,
