Northern Pass will severely decimate the greatest resource we have in New Hampshire, our forests, our views, our tourism.

Why on earth would we want to do this for a neighboring state with so little benefit to the New Hampshire citizens?

Why on earth would we want to create more ugly, old energy when there is so many more new ideas out there ie, wind, solar, water, etc.?

Whose pocket is this protecting and benefiting?

Not mine - just an average New Hampshire citizen from a Tourist Town!

PLEASE DON'T ALLOW NORTHERN PASS TO CONTINUE!!!
