Our home abuts the current power line and have no desire to have the new transmission line constructed next to our home. We are in the process of trying to sell our home and it most certainly has diminished the property value. For anyone to think it doesn't is living in a fantasy world. Any benefits the project brings to the area, in terms of employment opportunities, is strictly temporary. The fact that it may save us \$1.50 per month on our electric bill is a slap in the face! It in no way, shape or form, benefits the state of New Hampshire.

NO TO NORTHERN PASS!!!!
