Please do not ruin our beautiful state by allowing Northern Pass to go through. The beauty and activities that the landscapes in my region provide are what many tourists (and locals) come to visit and experience year after year. A huge percentage of those that live here year round depend on the tourism industry as their main source of income, not to mention many resorts and other businesses as well. Allowing the approval of this ridiculous transmission line to go through will ruin the livelihoods of many and will scar our beautiful state forever. Please do not allow this to happen.
