My ancestors arrived on the Mayflower, and the family has lived in New Hampshire ever since the state was founded. My great grandfather William H. Sawyer was Chief Justice of the Superior Court of New Hampshire. My grandfather donated Ossipee Lake land to the state for a park

All of which is to say that we know and love this place.

The state's natural beauty brings tourists from all over North America. Why would we sacrifice countless miles of pristine scenery for the benefit of Canada or Massachusetts?

Please insist that all of Northern Pass be buried, end to end, or that it not happen at all.

In just a few years, it will be made obsolete by local solar and wind options. If the project proceeds, the scars will be deep by then.

Vote no. Please.

Thank you.
