It seems that Governor Sununu is putting the monetary interest of big business over preserving the aesthetics of the State of New Hampshire.. I have personally experienced the impact of many giant towers along the Saint Lawrence Seaway in Canada, and it is a very negative unappealing landscape where it was once a pristine landscape. In addition I have also experienced the beauty of Acadia National Park in Maine which was preserved by the foresight of President Theodore Roosevelt during the early twentieth century. Fortunately America has many National Parks which retain the beauty and history of particular areas of America. Therefore, If the Northern Pass is essential to other states, we must have the foresight to preserve the beauty of New Hampshire by burying the Pass from it origin in Canada to its termination in New Hampshire. This alternative plan would Protect the aesthetics, environment, tourist economy, health, property values of New Hampshire, but most importantly the beauty of New Hampshire for the future will not be scared! Governor Sununu, I have asked you previously to reconsider your decision, and I ask you again to reconsider your decision on the Northern Pass Project.

Respectfully submitted,

Ruthann and Gerard Benson
