Our family home is in Campton, NH. The transmission lines will pass very near our property and through downtown Plymouth where our son graduated from Plymouth State University. This is a beautiful area and will not benefit in any way from this project. New Hampshire is being exploited as a pass-through to bring electricity to other states. The economy of this area is based on its natural beauty and in my opinion, the long-term economic benefit to our state will be negative. It will be very disruptive to downtown Plymouth and the overall beauty of the area. There is no way to undo the scars of transmission lines to the views from the mountaintops. These unspoiled views are what brings people to New Hampshire.
