### CommenterWords

Good day. I write this plead for the Northern Pass to be turned down and any and all sec permits,approvals NOT be granted for the following reasons.

1. Overwhelmingly the almost 100% of NH resident like myself AND their respective towns have voted NO, how you can even consider approval after a resounding NO from the people is beyond me, and I am sure against the NH constitution if not directly in spirit.

2. My property having incredible views will be forever ruined, having saved our entire lives to have pristine woodlands abound and serenity the obscene towers will destroy that and hamper the North country in tourist endeavors consistent with natur, and necessary to the dire straights we are in for survival.

Should you wonder drive to Syracuse NY head west along Rte 5 and see what the blight will actually look like,horrible destruction of a quiet way of life.

3. This is maybe the most legal point. I have been waiting for Eversource to provide us with a cost to have brought to our home, how long, over a year. We have received three different proposals from 45,000.00 to 28,000.00 still waiting. Additionally the NH PUC had adopted a rule to allow for 5 year payments but no the Public Utility Commision chartered to protect the hmmm, PUBLIC, its in the title has allowed for that provision to expire equipping full payment to Eversource to have power to survive...hmm yet we can't get a straight answer from Eversource. Additionally our home is under 100 feet from a class 5 fully maintained town owned roadway. Another example of how the utility is controlling the people...To date Eversource has yet to tell a single truth to us regarding the project and a year later we are still in the dark and yet to have a truthful dollar figure. This a clear example that Eversource statements are potentially false and misleading like the lies about Hydro Quebec.

Please do not ignore the PEOPLE's desires, as to do so is a travesty which will not go unanswered.

Thank you for your consideration

T. Emperor
