

## SEC COMMENTS COLLECTION

SECDocket	2015-06 Northern Pass Transmission - Eversource
CommenterName	Denise Greig
CommenterCity	Deerfield
DateReceived	12-22-2017

### CommenterWords

I respectfully urge the the SEC to deny the certificate for Northern Pass - a non-reliability project. We have one chance to get this decision right and there is so much at stake. Please select the option that invites innovation and not the dinosaurs that are towers and powerlines.

As a resident of this magnificent State and the Town of Deerfield, I cherish its rural character. If the industrial NP Project goes forward, it will have an unreasonable adverse effect on all of the things the State and its residents work so hard to protect and promote! Some of them include:

- \*environment: wetlands and wildlife, especially the Karner Blue butterfly and the wandering endangered Blanding's turtle
- \*historic sites: our past, present and future, passed from generation to generation
- \*aesthetics: rugged scenic beauty that restores the soul and draws others to visit
- \*tourism: our invitation to share the beauty - a backbone of our State's economy

Please deny the certificate.

Thank you for your service.
