To: Northern Pass Site Evaluation Committee Members. I am a life-long NH resident and an ardent opponent of the Northern Pass project. I am someone who takes the time to research a project and to determine what if any benefit it provides to NH residents. If there is a substantial benefit, I am often supportive of a given project and can understand the risks to those negatively affected. I have analyzed and weighed the possible benefits and costs of Northern Pass, including impacts on the community, other businesses, the special qualities that make NH a tourist destination. Based on my research, I believe it is very clear that NH residents willing bear the brunt of the negative impact of this project and willingness receive very little benefit. Please, I urge you to stop this project at least for the time being so that alternatives may be more fully looked into. Thank you.
