I and most off my community members are against this project. It will destroy the one thing we have left up in the North Country... our scenic beauty. There is no amount of money that is worth disturbing our flora and fauna. I am a Lodge owner and all my customers, some who have been coming for over 40 years travel many, many miles to Pittsburg to get away from skylines that include eyesores such as the transmission lines proposed in this plan that is trying to be shoved down our throats. We as a community and many along the projects intrusion of 192 miles have made it clear for years now that this is not wanted and not needed as sighted in the Tierney report. Please take our POINT OF VIEW into careful consideration as if this is approved will have negative impacts on so many levels, Thank you for your time, Patricia Kuncio, owner, North Country Lodge and Cabins.
