I really don't believe that this form of energy is going to do us any good. I love going to the mountains to see the views and where we go it would be an obstruction to the view off Diamond Pond Rd. With all the new renewable energy coming in to play (solar and wind) I believe our need for this antiquated type of energy will soon not be needed as much as eversource tells everyone. Once again I do not want to see this system go through because we the people of New Hampshire do not want it
