My name is Torin Judd and I live on Mt. Delight Rd. in Deerfield. We have 48 acres of property, the longest edge of which abuts the power lines.

I object to the Northern Pass project for 3 reasons.

1). The view which we have worked hard to cultivate from our house will be ruined with the appearance of towers. From an aesthetic point of view this is dreadful. From a financial point of view it's going to drop our property value. We have lived here 21 years and have worked tirelessly to create a well balanced, beautiful place where we can life with our wildlife.

2). Trees. We have a number of "heritage" trees that are over 300 years old very close to the power lines. If Eversource seems them a danger to the ROW they will be removed. This is virgin wood that's been here longer than this land has been a country.

3). EMFs. The tremendous amount of power that would run through this lines can't be good for anyone. We regularly walk through our trails on the property and we don't want to avoid part of it in order to stay clear of the electromagnetic field.
