

**THE STATE OF NEW HAMPSHIRE
BEFORE THE
NEW HAMPSHIRE SITE EVALUATION COMMITTEE
DOCKET NO. 2015-06**

SUPPLEMENTAL PRE-FILED TESTIMONY OF SAMUEL JOHNSON

**IN SUPPORT OF THE
APPLICATION OF NORTHERN PASS TRANSMISSION LLC
AND PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE
D/B/A EVERSOURCE ENERGY
FOR A CERTIFICATE OF SITE AND FACILITY TO CONSTRUCT A NEW HIGH
VOLTAGE TRANSMISSION LINE AND RELATED FACILITIES IN NEW
HAMPSHIRE**

April 17, 2017

1 **Q. Please state your name, title, and business address.**

2 A. My name is Samuel Johnson. I work for Burns & McDonnell Engineering
3 Company. I am a Senior Project Manager in charge of permitting. My current business address
4 is 670 North Commercial Street, Manchester, New Hampshire 03101.

5 **Q. Please describe the outreach that has occurred since the Application was**
6 **filed with the Site Evaluation Committee.**

7 A. As required by RSA 162 H:10, an applicant for a Certificate of Site and Facility
8 must hold public information sessions before and after the filing of an Application for a
9 Certificate. Northern Pass Transmission LLC (“NPT”) and Public Service Company of New
10 Hampshire d/b/a Eversource Energy (“PSNH”) (collectively the “Applicants”) held five public
11 information sessions in September 2015 to provide information and take questions on the
12 Northern Pass Transmission Project (the “Project”), prior to filing its application before the Site
13 Evaluation Committee (“SEC” or the “Committee”). After filing their application, the
14 Applicants held an additional five post filing public information sessions and participated in an
15 additional five public hearings with the Committee. At each of these sessions and hearings, the
16 Applicants presented information about the Project to the public and afforded the public an
17 opportunity to ask questions directly to the Applicants. Comments from the public were also
18 solicited.

19 Additionally, the Applicants hosted two sets of bus tours in which the SEC Subcommittee
20 members, interveners and the Applicants’ personnel participated in touring the proposed route.

21 In addition, as a part of the U.S. Department of Energy (“USDOE”) processing of
22 Northern Pass’ Presidential Permit application, DOE held a series of hearings to collect public
23 comments on the draft Environmental Impact Statement (“DEIS”).

24 The public information sessions, public hearings, and bus tour dates and locations and
25 USDOE hearings are noted in Attachment A.

26 **Q. Please describe the outreach that has been conducted along the Project route**
27 **since the Application was filed with the SEC.**

28 A. Outreach to municipalities, businesses, property owners, and others along the
29 NPT route is a priority for the Project team. Accordingly, the Applicants have continued their
30 outreach to key stakeholders including public officials, business leaders, business owners,

1 municipal officials, the general public, and landowners along the route. The Applicant's recent
2 outreach efforts to host municipalities, business owners, and property owners are described in the
3 Supplemental Pre-Filed Testimony of William J. Quinlan on March 24, 2017 at pages 7 to 10.

4 As described in my original testimony dated October 16, 2015, the Applicants' maintain
5 a Project database. Northern Pass continues to gather public input from a variety of sources, as
6 originally listed in my pre-filed testimony at pages 4 to 5.

7 As of April 13, 2017, the Project has received 4,453 contacts that have been logged into the
8 Project's database.

- 9 • The Applicants have received a total of 709 contacts since October 9, 2015 when
10 Appendix 42 was generated.
- 11 • In 2017, 103 contacts were received as of April 13.
- 12 • 440 contacts were received in 2016.
- 13 • In 2015, 166 contacts were received after October 9.

14 In 2017, most inquiries to the Applicants were for general information, followed by inquiries
15 about Project benefits and then job requests. Approximately 30% of all contacts were from
16 people who own property that abut the Project. These contacts are summarized in Attachment B
17 of my supplemental testimony, which is an updated Northern Pass Project Outreach Summary,
18 originally provided in the Application at Volume XXXIII Appendix 42.

19 The Applicants have continued to provide information to stakeholders in the form of
20 updates to the Project's website and / or direct oral or written communications. Monthly
21 newsletters provide Project updates and discuss various elements of the Project and the Forward
22 NH plan. Letters were sent to property owners who abut the Project when field work was
23 planned to occur in the area near their residences. Notifications were made when significant
24 SEC filings occurred such as the update to the underground design requested by the New
25 Hampshire Department of Transportation ("NHDOT"). Attachments E, F, G, H, and J of the
26 Supplemental Pre-Filed Testimony of William Quinlan contain representative samples of the
27 recent correspondence sent to stakeholders since the Application was filed.

1 **Q. Please describe the outreach that was conducted specifically for**
2 **municipalities and businesses along the Project route from the period of the filing of the**
3 **application to today.**

4 A. The Applicants have conducted outreach to all municipalities along the Project.
5 The Applicants have continued to engage in conversations with those municipalities that have
6 expressed willingness to discuss any aspect of the Project. The Applicants and its
7 representatives have met with several communities to discuss the design and routing through
8 municipalities trying to optimize routes and minimize potential construction impacts.

9 The Applicants continue work with host communities to address their concerns and avoid
10 inconvenience to the public. The Applicants have reached out to communities along the
11 proposed route to discuss their interest in entering a stipulation or Memorandum of
12 Understanding (“MOU”) with NPT. A MOU is a signed agreement that formalizes the NPT’s
13 commitment to work with host communities and confirms mutually-established expectations
14 (e.g., property tax commitments) and can address numerous construction issues, such as matters
15 of public health and safety, use of town roads, traffic controls, liability insurance, environmental
16 plans, emergency response, and reports to the municipality. It is the product of good faith
17 discussions between the host communities and NPT to constructively identify and resolve
18 specific local issues pertaining to the project. Each executed MOU will be offered to the SEC for
19 inclusion as an enforceable condition as part of the Certificate of Site and Facility. Please also
20 refer to the Supplemental Pre-Filed Testimony of William J. Quinlan at page 7 for a more in-
21 depth discussion of the MOU and a copy of a template which includes standard terms for such an
22 MOU, found at Attachment H of Mr. Quinlan’s Supplemental Pre-Filed Testimony.

23 The Applicants have also reached out to all municipalities (and in some cases town
24 residents) to outline the tax revenue benefits that the Project will provide. Information on the
25 estimated first year property taxable investment from the Project for each community, along with
26 the estimated first year municipal and local school tax payment was provided to each town.
27 Each town was also offered a tax pledge that would provide further certainty regarding tax
28 payments.

29 The Applicants have proactively communicated with the business community to answer
30 questions owners or managers of businesses along the Project route might have, and to offer to

1 work with businesses to address concerns they might have regarding construction in public
2 roads.

3 Before, during and after construction, the Applicants will implement a robust
4 communications plan and will meet and communicate regularly with business owners, residents,
5 and municipal officials to ensure local concerns are addressed and questions are answered.
6 Attachments F, G, H, and I of the Supplemental Pre-Filed Testimony of William Quinlan contain
7 representative samples of recent correspondence sent to host communities regarding potential
8 construction MOUs and tax revenues and inviting discussions about construction impacts.
9 Attachment J of Mr. Quinlan's Supplemental Testimony also contains a representative sample of
10 recent correspondence to businesses along the route to ensure coordination with businesses
11 throughout construction.

12 **Q. Does this conclude your testimony?**

13 A. Yes, it does.
