Pamela G. Monroe

Administrator

New Hampshire Site Evaluation Committee

The vast majority of the people living along the pipe route have rejected the pipe. It is morally wrong to forcibly take their land and ruin the landscape just so that a few people can get richer selling gas overseas. New Hampshire does not need or want this gas, not at this price.

New Hampshire exports almost half of the electricity it generates. So obviously there is no need for more natural gas to generate electricity in New Hampshire. Most people will agree that we need to wean ourselves off of fossil fuels. Why don't we start weaning right here, right now.

We need to get away from fossil fuels, not add more. All that extra volume will enable war in Europe. The Pope has already called the conflict in Ukraine "the seeds of WW III". Another company, Portland, has offered to use their existing capacity to feed New Hampshire's future growth needs over another route. If KM gets this pipe, their market share will grow past 25% and edge them towards monopoly, de-stabilizing the industry, allowing KM to fix prices.

Thank you
