Subject: Docket 2015-08 comment

NHSEC

Please note that Distrigas has contracts that provide enough LNG to cover seasonal peaks In New England with no additional costs for new infrastructure. Also, the TGP/CT Extension pipeline and the AIM (Alconquin) pipeline are less costly, already approved, and will boost New England's supply by 10% and they are due in service by 2016, long before NED in 2018.

Thank you
Paul Stevens
