

Pamela Monroe
NH SEC

Good New Hampshire people do not use political clout to be exempt from the Clean Air Act. If my car fails an emissions test, I can't

drive it until I abide.

I'm not allowed to dump benzene, toluene, and hundreds of other toxic chemicals into the ecosystem in any quantity, let alone the

tons Kinder Morgan is planning on.

I'm not allowed to partake in an action that repeatedly makes people sick or cause them to die.

I'm not allowed to disturb the peace with a noisy party day and night.

You know the noise this equipment makes. You know the pollution and destruction and illness and death pipeline activities cause.

Kinder Morgan stood before the Town of New Ipswich and said they cannot guarantee the safety of the pipeline and that accidents

will continue to occur, including those that cause death. They have no right to expose me to that. Most corporations no longer allow

smokers to expose us to those hazards. Why do you think you can allow them expose us to known carcinogens, neurological harm

and other illnesses?

We saw videos of people who live near far smaller compressor stations than that proposed for New Ipswich and they say they have

no peace day or night. They cannot use their yards and homes in a normal way. They cannot sell to move away from the

destruction as the properties have no buyers. You know this, you know this, you know this, but you still seem willing to allow

Kinder Morgan to continue to destroy and harm and even kill people through stress, illness and accidents. Your actions can take

away our right to live a peaceful and happy life. That's a right. You have no right to take that away.

It is unconscionable to construct a compressor station next to that lovely Temple elementary school where the out-gassing will fall

upon small children and their families. That school is also the emergency shelter for the Town of Temple. Is Kinder Morgan going to

relocate the school? Is Kinder Morgan going to build an alternate emergency shelter for the residents of Temple? Or is Kinder

Morgan and FERC and the NHSEC going to move "forward" and put those children in harm's way?

The good people of New Hampshire don't deliberately put children in harm's way for the sake of profits. How can you think it's your

right to destroy and confiscate what you want from others whenever and wherever you choose? Our ancestors did that to Native

Americans. I thought we all agreed it was wrong to do that.

Massachusetts sent Kinder Morgan away so they just bumped the path up into New Hampshire and then stood before us and said

they selected this path because it was in the best interest of the people of New Hampshire. Who writes these fairly tales? Kinder

Morgan stood in the New Ipswich high school and told us NO ONE along the Southern New Hampshire pipeline route will get any of

this gas. NO ONE. NO ONE. NO ONE. So it is not in the best interest of New Hampshire. The path was bumped up into New

Hampshire for one reason: Massachusetts had the money and influences to kick it out of their state.

I have spent much of my life working very hard to keep the peace of my home and you have no right to stomp upon me and decide

I am not worthy or entitled to keep what I have earned.

Kinder Morgan and Tennessee Gas look upon us as disposable pawns in the search for a path of least resistance. We were told

because there is a lesser population density here they can use a thinner pipe! Human lives are human live wether they live in the

city or the country! You are not concerned with protecting us. You are seeking another way to increase corporate profits. If you were

concerned, the quality of pipe would be determined by its use and the terrain and forces upon it, not how many people will be

surrounding it. Stripping a path through Southern New Hampshire will alter the ecosystems and wetlands, exposing them to

drought, encouraging forest fires, damaging our limited fresh water supplies, and essentially, destroying all we and those before us

have struggled to protect and preserve for hundreds of years. Long before you gouged the earth for your private interests, smarter

people chose to live with less to preserve and protect for future generations.

Draining our precious U.S. non-renewable energy reserves with such carelessness and recklessness is beyond reason. Selling off

our resources and lives to overseas markets; that's what this is. HOW ROTTEN a thing to do.

Don't do this to good people - deny NED!

Thank you
