Subject: Intervening in the FERC process

Hello Ms. Monroe,

My name is Kaela Law and I would urge the SEC to file a motion to intervene in the Northeast Energy Direct FERC docket CP16-21-000.

IV. The committee shall consider intervention in Federal Energy Regulatory Commission proceedings involving the siting of high pressure gas pipelines in order to protect the interest of the state of New Hampshire.

Intervention does not have to mean support or opposition for any particular pipeline, but will ensure the state agencies have a hand in the matter. Please file a motion to intervene.

Thank you,

Kaela Law
Pelham, NH
