Subject: SEC docket 2015-08

Dear Pamela,

I am writing, urging the SEC to file intervenor status, regarding the proposed NED/Tennessee gas pipeline, and all related infrastructure. I live in New Ipswich, NH , and our town has a compressor station proposed to be built here, the biggest compressor ever built, by the financially in debt, Kinder Morgan. I am opposed to this project and ask that the SEC become a intervenor in order to best represent the people and property that will suffer. Increased health risks from carcinogenic gas infrastructure emissions, as in Minisink, NY, property loss by eminent domain for corporate gain, and gas we will NEVER USE! This is a GREED not NEED project, and needs to be put under the microscope!

Than You for your time, and consideration.

Karen Miller
