Subject: Intervenor Status

I strongly urge the SEC to register to become an intervenor in the NED Pipeline.

The SEC should do this because:

- 17 towns in NH can be affected by this pipeline
- Over a thousand acres of conversation or private land will be taken
- The proposed compressor station could have a large deleterious affect on the health of many citizens, their animals, and wildlife

You have nothing to lose by filing. You are reserving your right to participate in the process. Please do so!

As a NH resident, I reasonably expect that our SEC members always have the best interests of NH citizens at the forefront of their tasked responsibilities and will take all necessary steps to ensure that NH citizens are represented appropriately and adequately at relevant proceedings.

I expect to receive notification from FERC of the NH SEC filing for Intervenor status with the time deadline. If the SEC chooses not to file, they are abrogating their responsibilities.

Additionally, I encourage each of you to file as an individual. Since each of us might have to pay a tariff on our electric bills, we are all affected.

Sincerely,
Lisa Derby Oden
New Ipswich, NH
